Activity/Sequence	of Job Steps	Potential Hazards/ Inj	ury sources	Safe Action or Procedure		
Working around la	arge animals	Working with possible chemics animals Bites/scrapes/gor Stepping on/fallin Allergic reaction Animal borne path	rges ng on ons	 If the animal is contaminated with a known or unknown chemical agent, the APHIS Safety Officer will confer with and follow the procedures of the Incident Safety Officer. APHIS personnel should have a basic understanding of animal behavior and characteristic before working around animals. A number of articles discussing safe animal handing are provided (see appendix 3-7-A Animal Safety Guidelines). The appendix can be used to provide training or develop guidelines for APHIS personnel not familiar with working with the animals of concerns. The dust and particulate matter in animal areas may cause throat and eye irritation. Goggles and n-95 dust masks are to be used as needed. APHIS personnel should be familiar with the signs of an allergic reaction (sneezing, tearing, watery nasal discharge, congestion, skin rashes, asthma), report to their supervisor if symptoms are noted and be examined by a physician.

borne diseases.	

^{*} Supplemental Information

Basic Disease Transmission Prevention

- Wear disposable boots or rubber boots that can be disinfected, if you must visit farms.
- Wash clothing and footwear using an APHIS approved disinfectant after contact with foreign livestock or poultry.
- Clean nostrils and fingernails and wash hair thoroughly after contact with foreign livestock or poultry.
- Dispose of clothing, shoes, equipment, cameras, and other items that are difficult or impossible to disinfect.
- Keep clean clothing and footwear available for visitors to wear if they must be around your livestock or poultry.
- Provide shower-in, shower-out facilities if possible.
- Discourage handling of animals by all visitors.
